# 1 Introduction

## Portable Extension Warlock v2.2.0 build 1 - November 3rd, 2017

Tested and works on Windows 10.

Note: Please let me know if you test on others that is not listed. Just because it is not listed does not mean it will not work on previous/future versions of windows.

Main Screen

- Allows you to create a list of portable applications and their extensions for launching from a portable drive by launching the DropZone that is included.
- You can also use it on your system if you place a shortcut to the launcher in the **Send To** menu, then you don't have to mess with the system file associations.
- Software Requirements: .NET Framework 4.0.

Last Update of Entire Documentation - November 3rd, 2017.

### 3 Version History

?	Actual Meaning
+	Added
*	Improvement/Modification
!	Bug fixed
@	Other Notes

Version	?	Information
2.2.0 build 1	+	Added directory support via <b>&lt;dir&gt;</b> as an extension in each application you want it for. Recommended to create a windows explorer application entry with <b>&lt;dir&gt;</b> as the only extension if you want to open directories with windows explorer if you have at least one entry which handles directories.
"	!	Minor bugs fixed.
2.1.0 build 5	!	Fixed a bug with the launcher. (Note: Thanks lanux128 from DonationCoder IRC channel.)
2.1.0 build 2	!	A few bugs from previous version of the Launch File Configuration fixed.
2.1.0 build 1	+	Ability to create the icons for existing applications and automatically for new and edited applications if they don't already exist.
"	+	Launcher was updated to allow for key press find of applications by first letter only.
2.0.2 build 2	!	A couple more bugs fixed. (Note: Thanks stisev on the DonationCoder forums for the report.)
2.0.1 build 1	!	A couple bugs fixed for when settings and launch file wasnt found. (Note: Thanks stisev on the DonationCoder forums for the report.)
2.0.0 build 1	*	Lots of code rewrite/improvements to the launcher and launch file configuration editor makes for a better looking launcher.
"	+	Added more launcher appearance settings editable thru the launch file configuration editor.
1.0.7 build 1	*	General improvements to each PEW executable.
1.0.5 build 1	*	Changed menu colors and a few other optimizations to code.
1.0.2 build 0	!	A couple bugs fixed.
1.0.1 build 12	@	Final Release barring any major bugs found before 2012.
1.0.0 build 73	! + *	DropZone was not loading/saving the LauncherApplication setting under certain circumstances should be fixed.

4	Portable Extension Warlock Help	
		(Note: Thanks goes to thomasp67 on the DonationCoder forums for the valuable information that helped track the bug down.)
"	!	Fixed the backup save routine to where it should now display the right month and year of the launch files.
"	*	DropZone settings now use the same backup routine as the launch files.
1.0.0 build 1	@	Initial Public Version
